KEPLER AT IMERSA

This week, Nina travels to the fifth annual IMERSA conference in Denver, where she'll present with California Academy of Sciences' Ryan Wyatt on *The Kepler Story's* success at the Morrison Planetarium. She'll screen excerpts from the show, including some favorite immersive scenes (remember the snowflakes?), and talk about the genesis of the show, as well as some of the challenges and magic of producing it in the dome.

The IMERSA Summit is the fulldome industry's annual conference dedicated to "shaping the future of the digital immersive space." We're excited to share "the story" of *The Kepler Story* with amazing group of creative thinkers and innovators from around the world.
